

📍 Prague

Technical Project Manager

We are looking for an experienced Technical Project Manager who will be a part of our strong R&D center focused on the development of cutting-edge technological products which are used in electrical cars.

Your challenges?

Lead product development phase from concept definition/RFQ till customer validation. Perform change management if required. Be responsible for the development of a complete product. Coordinate the R&D team (e.g. mechanical, electronic, and validation leaders). Answer the technical part of RFQs. Analyze customer requirements. Lead product development and support industrialization (design for manufacturing). Represent the R&D team toward project management, organization, and customer. Develop and control a budget for the R&D project. Report R&D project status to the Project Manager and the Steering committee. Secure quality and process of product development. Plan R&D activities and make sure the right resources are assigned by métiers (people & means). Identify risks and develop a mitigation plan for project risks. Analyze the impact of change requests (customer and internal) and follow their implementation. Manage product configuration and delivery (product/documentation). Perform design and technical reviews.

Let's talk about You.

Automotive experience min. 5 years required. Master degree in a technical area in one of these technical fields (electronics, software, automotive, electrical engineering, automatization, machinery, physics, mechatronics, industrialization). Technical thinking, experience with SW, HW. At least 3 years

of experience in projects as a project team member/project manager. Excellent English for daily communication. Driving license and willingness to travel to customer meetings in Europe. A team player, assertive, open-minded, decision-making personality.
